

CKG-RL framework

Simplified training-to-inference view for strict item-cold recommendation

Main story: Encoder -> simulator training -> policy learning -> strict cold retrieval

Key contributions

Content-anchored cold representations

RL curriculum simulation

Strict cold-only retrieval

Notation and visual grammar

q_i : course representation

s_t : simulator state

S_t : exploration set

z_u : user embedding

h_t : learner hidden state

—> forward

- -> training signal

—> stage transition
